

VOICES

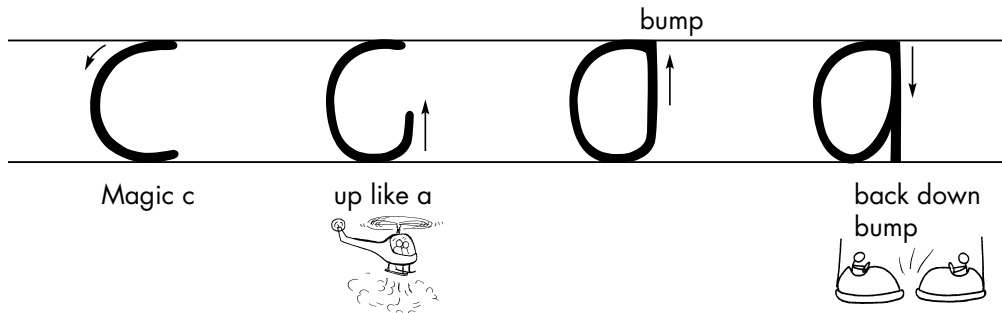

Even with the child friendly language in the HWT program, the steps for forming letters can get a little boring. Repeating step-by-step directions using different voices makes it fun and really helps solidify the steps in students' minds.

Preparation

1. Pre-mark the double lines on the chalkboard.
2. Begin at the far left of the board.
3. Have students open their workbooks to find the step-by-step directions for forming the letter you have chosen.

Directions

1. Demonstrate the letter formation step-by-step.
2. Say the words that are in the workbook, and ask children to say the words with you.
3. Repeat the activity using the following voices:

- **high**
- **low**
- **loud**
- **soft**
- **slow**
- **fast**

Tips

- Allow your students to pick the voice for the class to use. Make it even more fun by trying voices that are spooky, shaky, robotic, etc.
- Teach with voices using the Magic C Bunny by having the bunny whisper in your ear the voice the children should use.
